Environmental Restoration
DOE/RFFOFISCAL YEAR 1996 POTENTIAL ACCELERATED CLEANUP ACTIONS, SCOPE AND
ESTIMATES FOR OPERABLE UNIT NO. 8 - WAF-006-95

Action: Review documentation and respond by May 5, 1995

As you know, scope and estimate documentation for the three potential accelerated actions scoped for Operable Unit (OU) No. 8 to date have been prepared and presented in a document titled "Fiscal Year 1996 Potential Accelerated Cleanup Actions, Scope and Estimates for OU 8." This document was hand delivered to you on April 11, 1995 by Mike Jennings. As you know, the schedules developed for these removal projects call for completion of the removals in Fiscal Year 1996 (FY 96). However, to meet that completion date, work on these removals needs to start soon.

EG&G Rocky Flats, Inc. is proceeding with the Davis-Bacon determinations for these three removals, but additional work will not proceed without explicit Department of Energy/Rocky Flats Field Office (DOE/RFFO) approval to proceed. We recognize that you have many other projects underway and the urgency of this approval may not be readily apparent. However, unless approval to proceed is received soon, schedule slippage will begin to occur. In addition, funds to proceed with this work are presently available, but may be lost if this work is not authorized soon.

Please review the subject documentation at your earliest convenience. Unless we hear from you by May 5, 1995, work on these projects (other than completion of the Davis-Bacon determination) will be suspended, possibly resulting in the removals not being completed in FY 96. If you have any questions regarding the technical content of the documents, feel free to contact me or Mike Jennings. We are anxious to complete these important risk reduction activities and look forward to your approval to proceed.
